# Product Details

## Image Files on USB drives

All of our professionally edited image files on a super high quality 32gb swivel USB drive. Your images will be organized in folders by category. This drive will come with a copyright release form, granting you permission to print and use your pictures on Facebook, in photo books, photo gifts, etc.

## 50 wallet size photo cards

These are double sided cards, which can include an assortment of your favorite engagement or wedding pictures on one side, any message you like on the other ("Thank you for being part of our special day!" or "Check out all our wedding pictures online at [web address]" or perhaps share you first home address together) They're great to include with wedding invitations (if you choose to use your engagement photos), share with wedding guests on your wedding day, or include with the pile of thank you notes you'll be writing. Corners can be square or rounded, and additional packs of 50 are available on request for \$25/pack.

## Photo box full of proof prints

A standard size photo box with a 4x6 print of every single one of your final images. Organized with custom tab dividers that mirror the category folders on your USB drive. Each picture will have the image file number printed on the back, so you can look through your box of pictures to pick out your favorites, then easily find the files you want on your USB drive. This photo box should be in your hands no later than 2 weeks after your wedding day.

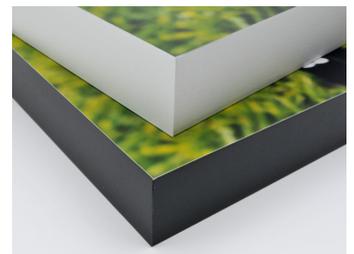

## Engagement Session

1 hour session at the time and location of your choice. You'll get about 60 professionally edited images. Print packages will be available for additional charge, and a USB drive with your image files will be included with a print purchase over \$50.

## Mounted Prints

Your simple option is mounted prints, which come ready to hang on 1.5 in foam board with white or black trim. It's a very modern look similar to canvas wrap, but cropping options are more flexible. You can choose regular photo paper with a protective luster coating, or a metallic print. If you would really prefer a canvas wrap, or a good old mat and frame, just say the word. You totally have options if you want them!

## Albums

The classic, sewn bound, hard cover photo book ranges from 60-100 pages and can be customized with a leather or fabric cover in a choice of 12 different shades (3 leather colors, 9 linen colors). The paper quality is simply excellent, with a lay flat design that makes it possible to seamlessly print a photo across a two page spread. These are classic, high quality books you will love sharing for years to come.

You can choose to be super involved with the design process, or pick out the size and cover color and leave the rest to me.
