

## How WAVE HD Productions differs from the competition

### We have your event covered with Video and Still shots.

WAVE HD uses at least 3 High Definition Digital Camcorders throughout the ceremony and most events. These additional camera shots ensure that all of your best moments are recorded discreetly for your final movie. Our camcorders are small but very powerful, record in High Definition 1920x1080, and have built-in digital cameras for manual and automatic photos. Wireless and directional microphones are also used to clearly record the special words spoken during the ceremony.

### You get a great movie you can share.

WAVE HD uses state-of-the-art editing technologies to create a professional studio grade quality movie. And because we know you will want to share your movie with special family members and friends, you receive a total of 10 professionally produced DVDs. Special pricing is available if you want to provide a DVD to each guest or get your day on Blu-ray disks. We strive to make your day special and provide you and your loved ones with years of wonderful memories. Serving Central Ohio and beyond.

*"We love our wedding video. It is great to relive it in HD, and to be able to share our special day with our family who couldn't make it. WAVE captured the spirit of our wedding with their cameras. Thank you James!" - Ian MacConnell*

*"WAVE did a great job, and we love what they did with our family photos. It's so much more than a wedding video. It's like our life's history leading up to and including the greatest day of our lives. The DVD is something we will cherish forever. - Christa Yandrich*
