

We understand that you have a lot of options when it comes to selecting a wedding videography company. We'd like to tell you a little bit about the Firefly Experience, and what you'll receive from us if you choose us to capture your wedding day:

1. We are videographers who love capturing weddings and providing final keepsake videos that let you relive the day as it happened. We are not filmmakers or cinematographers; we are passionate, experienced wedding videographers, and we are proud to say that!
2. We are a male/female videographer team: Maurice and Carrie. We have known and worked with each other for 20 years, so we can practically read each other's minds. We know how to work together to produce the best results!
3. A photographer captures a moment in time, and many can be posed moments. Some videographers also do posed shots for their use, but we don't. We capture the true movement of your wedding day. Everything you see on your video will be as it happened.
4. We do not come in with huge equipment; our cameras are small and unassuming. We do this because it's our job to be in the background and ideally we don't want to be noticed. We also come in, when necessary, with small Bluetooth mics (that hide perfectly in a suit pocket!) so we can make sure we capture your words during the ceremony.
5. We will show your entire ceremony in your full feature video. There are no special effects or music overlays during the ceremony footage unless you request them.
6. When we cover a reception, we don't just provide you with quick highlights set to music. You'll see the speeches, the first dance, the father/daughter dance, the mother/son dance, the cutting of the cake, and the bouquet and garter tosses, along with any other unique events you may have!
7. We can cover not only your ceremony and reception, but also your day of prep (for the bride and groom), first looks, pre-ceremony photo shoots, send-offs, and also any activities before or after the wedding such as rehearsals, rehearsal dinners, or gift opening brunches.
8. We prefer to use two videographers for the wedding ceremony. Even with a short ceremony, it can be very difficult to capture it with just one manned camera, and because the ceremony is the most important part we don't want to miss anything! Two videographers also means two different perspectives, and it allows us to cover the reactions of both the bride and groom!
9. While we are open to providing just one videographer for prep and reception coverage, we will always shoot with two videographers for the ceremony. Why? Because there are two of you. And with only one videographer, we can't capture you both. We want to be able to capture both of your expressions and movements, and not have to compromise. We will work within your budget to determine whether one or two videographers are needed for your prep and/or reception coverage, but your ceremony will always have two videographers no matter what.
10. We work as a team to make sure your Firefly experience is a positive one! From working with you prior to the wedding to make sure we are covering everything appropriately, to the design of your personal website, to the music selection, to the video editing, we work together throughout the whole process to make sure you get the best experience possible from start to finish.
